

Premium Polyester Insulation

GREAT FOR THE ENVIRONMENT

Air Diffusion Agencies polyester

- is 100% recyclable and has a zero ozone depleting potential (ODP).
- A majority of the raw materials used in its manufacture is recycled polyethylene terephthalate (P.E.T) clear plastic beverage containers.
- Does not contain any volatile organic compounds (VOC), or corrosive chemicals.

MEETING YOUR NEEDS

- Common Fiberglass insulations on the market can cause eye, skin and nose irritation, breathing difficulties, a sore throat, hoarseness and coughing. Polyester however, sheds no dangerous fibres.
- The polyester that is commonly used in bedding, clothing and pillows is made of the same fibre that makes ADA Insulation.
- Product thickness, density and size can be customised to particular project requirements.

A SOUTH AUSTRALIAN PRODUCT

- Air Diffusion Agencies proudly supports The Industry Advocate's SA Product Register. ADA Polyester Insulation is SA Manufactured, SA Assembled and SA Supplied.
